DEPARTMENT OF DEFENSE

REPORT TO SATISFY THE REQUIREMENTS OF

SECTION 503(f) OF THE

SUPPLEMENTAL APPROPRIATIONS ACT OF 1987,

P.L. 100-71

The attached information responds to the reporting requirement set forth in the Supplemental Appropriations Act of 1987, P.L. 100-71. This report is submitted to Congress in response to the requirements of Section 503 (f) of the Act. The Act requires this report (relating to drug testing activities) from each agency covered by Executive Order 12564.

Following is a description of each of the DoD components that have civilian drug testing plans certified by the Department of Health and Human Services. The Civilian Drug-Free Workplace program is managed through the office of the Department of Defense Coordinator for Drug Enforcement Policy and Support. Approximately 10% of the total Department of Defense civilian work force is eligible for testing. Job functions associated with those personnel in testing-designated positions are positions that have a direct and immediate impact on public health and safety, the protection of life and property, law enforcement or national security. In FY92, less than one percent of those persons tested have tested positive.

Department of the Army

The Department of the Army, the first federal agency to begin drug testing in 1986, continues to move forward in establishing a safe and drug free workplace for all personnel. In FY92, of those civilian employees in testing designated positions (TDPs), a minimal number of positives were recorded. For the last three fiscal years, the drug positivity rate for civilian employees in the TDPs has remained low. Initiatives begun during the past fiscal year to increase the number of testing designated positions and enhance the Army's Federal Drug-Free Workplace Program are now being finalized.

Department of the Navy

During FY92, the Department of the Navy continued its drug testing program on civilian employees in specially designated positions. A positive rate of less than one percent occurred. On 14 August 1992, the U.S. District court, Northern District of California issued a decision which granted summary judgement in favor of the Department of the Navy to allow post-accident testing and the random testing of employees in additional testing designated positions. The newly approved TDPs include medical positions which provide direct patient care as well as other wage grade positions. Employees who test positive continue to be referred to the Civilian Employee Assistance Program and disciplined for illegal drug use.

Department of the Air Force

The Air Force Civilian Drug Testing Program was initiated in January of 1990. It has been fully implemented at 99% of the Air Force bases. Negotiations with local union officials at the remaining two bases continues with 100% implementation expected shortly. Of those personnel identified as testing designated positions, fewer than one percent have resulted in illegal positives.

In the Spring of 1990, suit was filed against the Air Force on behalf of the unions in the District Court of California, Eastern District. During the Summer of 1990, the Court ordered the on-going drug testing litigation be resolved through motion rather than through trial. A hearing was held in December 1990. In September 1992, the Court upheld the following ruling: random testing will be allowed to continue; limited reasonable suspicion testing for non-TDPs when improper or unacceptable job conduct is exhibited; limited conditions for visual monitoring of urination (suspected adulteration or tampering); and upheld limiting post-accident or safety mishap testing when sufficient evidence exists indicating the employee may have caused the accident in question. The Court however did remove three tool makers at Eglin AFB, FL, as well as any medical officers performing exclusively administrative and or research functions from the test pool.

The exact terms of the Court decision will be included in the next update of the Air Force Civilian Drug Testing Plan. These proceedings have not been seen as adversely impacting the management or administration of the Air Force Civilian Drug Testing Program.

Defense Contract Audit Agency (DCAA)

The Defense Contract Audit Agency is responsible for performing all necessary contract audits and providing accounting and financial advisory services regarding contracts and subcontracts to all DoD components responsible for procurement and contract administration. The DCAA began active testing during FY91 and continues conducting random testing of its testing designated positions. The testing designated pool consists of all DCAA employees holding active security clearance. To date, there have been no tests resulting in a confirmed positive. Due to the shortage of hiring, the number of applicants tested has been minimal; none have tested positive. DCAA has performed the requisite quality control tests along with its random and applicant testing. AFGE filed a civil suit in U.S. District Court over DCAAs inclusion of employees with a "confidential" security clearance in the random testing pool. This litigation is ongoing.

Department of Defense Dependents Schools (DoDDS)

The Department of Defense Dependents Schools (DoDDS), administers an educational system for those in kindergarten through grade 12 who are minor dependents of both military and civilian DoD personnel stationed overseas. The DoDDS drug testing regulations have been re-written to comply with the latest policy guidance from the National Drug Control Policy (ONDCP). Testing Designated Positions (TDPs) have been considerably narrowed and now apply to fewer than 100 overseas positions. DoDDS is currently working on an agreement with Army, Navy, and Air Force for the use of their employee assistance programs consisting of: collection, transportation, and processing of specimens. Supervisor and employee training/education include types and effects of drugs, symptoms of drug use, treatment and rehabilitation programs, the distribution of written materials, and video presentations.

Defense Intelligence Agency (DIA)

The Defense Intelligence Agency is responsible for satisfying foreign intelligence requirements of the Department of Defense. Although the Defense Intelligence Agency is exempt from Executive Order 12564, the Agency developed a Drug-Free Federal Workplace Program which began in September 1989 and provides for applicant, reasonable suspicion, random, follow-up and unsafe practice testing. Random testing, which was initially deferred, was implemented in August 1992. Additional program elements include the Employee Assistance Program (EAP), supervisory training, and employee awareness initiatives. The number of employees participating in the EAP as a direct result of illegal drug use is negligible.

Defense Investigative Service (DIS)

The Defense investigative Service conducts all Personnel Security Investigations for DoD Components and, when appropriate, for other U.S. Government activities. During FY92, DIS greatly increased the number of random drug tests performed in the pool of testing designated positions (TDPs). At the end of the fiscal year, the Director, DIS, increased the random testing base. To date, there have been no positive tests. DIS has had no occasion to perform anything other than random testing during FY92. Due to a stringent hiring freeze and the overall effects of the drawdown, DIS has not implemented outside applicant testing. DIS is working with OPM and a private contractor to produce a drug program training video and training session for DIS employees and supervisors. This is being done to allow for increased acceptance and understanding of the drug testing program.

Defense Information Systems Agency (DISA)

A principle mission of DISA is to provide systems engineering and technical support of high priority communications-electronics established for command and control of our nation's military forces by the President, Secretary of Defense, and Joint Chiefs of Staff. During FY92, DISA continued its efforts to foster a drug-free workplace by redefining the pool of testing-designated positions (TDPs) to include all positions requiring Secret or higher security clearances. Applicant and random testing were conducted in compliance with Executive Order 12564 and the mandatory guidelines for civilian drug testing programs established by the Department of Health and Human Services. Of the tests conducted in FY92, none resulted in a confirmed positive.

Defense Logistics Agency (DLA)

The Defense Logistics Agency provides worldwide logistics support for Department of Defense missions. DLA has a centralized civilian employee drug testing program with a full-time Drug Testing Operations Officer located at the DLA Civilian Personnel Service Support Office in Columbus, Ohio. Program policy guidance is provided by the DLA Headquarters Office of Civilian Personnel. FY92 was the second full year of testing under the DLA Civilian Employee Drug Testing Program. A notable decrease in the number of positives occurred from the previous year.

Due to new mission assumptions, the Agency's TDP pool has grown. On 18 Jun 1992, the *Plane v. USA* lawsuit, filed against DLA by AFGE Local 1626 in the Western District Court of Michigan, was resolved in the Agency's favor, thus opening the way for implementation of reasonable suspicion and post-accident testing. Once the start of new program guidelines begin, (during the second quarter of FY93), the DLA Civilian Employee Drug Testing Program will be considered fully operational.

Defense Mapping Agency (DMA)

The Defense Mapping Agency (DMA) Drug-Free Workplace Plan was fully implemented in October 1989. The DMA Plan was issued in accordance with Executive Order 12564. DMA is a Combat Support Agency engaged in the production and distribution of maps, charts, precise positioning data and digital data for strategic and tactical military operations and weapons systems guidance. Most positions require a background investigation with Top Secret clearance and access to Sensitive Compartmented Information. The DMA Plan includes policies and procedures for:

- (1) Employee Assistance Program (EAP), including mandatory

referral for rehabilitation on a first positive drug test result; (2) supervisory training; (3) employee education; and (4) identification of illegal drug use through drug testing on a carefully controlled and monitored basis, to include random testing of employees in Testing Designated Positions. In FY92, DMA random tests resulted in less than one percent positive.

Defense Nuclear Agency (DNA)

The Defense Nuclear Agency conducts research and development activities for operational matters. Additionally, DNA is responsible for matters concerning survivability, effectiveness, nuclear weapon use, and nuclear weapons effects on weapons systems and forces. The Defense Nuclear Agency Drug-Free Workplace Plan includes policies and procedures for employee assistance/counseling; supervisory training; employee education and identification of illegal drug use through drug testing on a carefully controlled and monitored basis. During FY92, those employees who were randomly tested produced no positive results. In meeting new guidance established by ONDCP, DNA revised its testing-designated positions (TDPs) pool to include employees holding Secret security clearances. Education and training of supervisors as well as employees is a continuing process at DNA.

National Security Agency (NSA)

The National Security Agency (NSA) is responsible for centralized coordination, direction, and performance of highly specialized intelligence functions in support of U.S. Government activities. NSA began its civilian testing program in September 1988. Although NSA is exempt from Executive Order 12564, it has developed a drug testing program that applies to applicants; employees who, as previous drug users, sign an Employment/Access Agreement at time of hire to refrain from drug use and to remain subject to follow-up testing for a period of five years; employees who may be the subject of a security investigation, job-related accident, or unsafe practice; and, employees under reasonable suspicion of drug abuse. In FY92, none of the employees tested positive.

Office of the Inspector General (OIG)

The Office of the Inspector General (OIG) conducts, supervises and initiates audits and investigations relating to the administration of programs and operations while keeping the Secretary of Defense and Congress fully informed of problems or deficiencies. The OIG updated its Drug-Free Workplace Plan listing of Testing Designated positions (TDPs) in April 1992 using Office of National Drug Control Policy criteria. The

majority of positions meet the TDP definition since they are sensitive positions requiring Secret or higher clearance. Since December 1990, the OIG has conducted applicant testing for all employees tentatively selected for Testing Designated Positions. Monthly random drug testing began in March 1991. During FY92, random drug testing resulted in a minimal number of positives. The OIG provides continued training and education through supervisory sessions, articles and educational material.

Office of the Secretary of Defense/the Joint Staff (OSD/JS)

Washington Headquarters Services (WHS) provides administrative and operational support to the Office of the Secretary of Defense and the Joint Staff. During FY92, the drug testing program for the Office of the Secretary of Defense and the Joint Staff became more effective and efficient by transferring its testing function to a new laboratory, Northwest Toxicology Inc., Salt Lake City, Utah. As a result, the time span from point of collection to receipt of results decreased substantially. Drug abuse educational material continues to be provided throughout the year for both supervisors and employees through regular mail distribution, in-house publications, and individual requests. In the tests conducted during FY92, none tested positive.

Uniformed Services University of the Health Sciences (USUHS)

The Uniformed Services University of the Health Sciences is the Nation's federal university for education and research in military and disaster medicine as well as the health sciences. Efforts are currently underway to expand the USUHS testing designated position pool. To date, there have been no positive test results. Education and training for USUHS' employees and supervisors in their responsibilities and expectations of the Drug-Free Workplace Program is offered throughout the year.

(2) Procedures for retention and retesting of specimens confirmed as positive.

(3) Procedures for providing urine specimens that allow individual privacy, unless there is reason to believe that a particular individual may alter or substitute the specimen to be provided.

(4) Procedures to protect the confidentiality of test results, under 5 U.S.C 552a and 7301 (reference (c)), and related medical and rehabilitation records consistent with applicable law and regulation.

2. Personnel Actions

a. **Drug Use Determination.** The determination that an applicant or employee has used illegal drugs may be made on the basis of direct observation, a criminal conviction, confirmed positive results of a test conducted under the DoD Component's drug testing program, the employee's own admission, or other applicable evidence. Actions taken against an employee, on a finding of illegal drug use under 5 U.S.C 75 (reference (c)), must be supported by the evidence.

b. Applicants

(1) Applicants who are not current employees and who refuse to be tested must be refused that employment.

(2) All applicants with verified positive test results shall be refused employment. Applications from such individuals shall not be considered for employment for a period of 6 months from the date of the test results.

c. DoD Components, in addition to any applicable personnel actions, shall refer any employee found to have used illegal drugs to an EAP for assessment, counseling, and, if applicable, referral for treatment or rehabilitation. Employee participation in treatment or rehabilitation programs through the EAP does not prevent the DoD Component from initiating any disciplinary action authorized on a finding of illegal drug use, including removal from Federal service.

d. DoD Components shall not allow any employee to remain on duty in a sensitive position who is found to use illegal drugs before successful completion of rehabilitation through an EAP. As part of a rehabilitation or counseling program, the Secretary of Defense, or the head of each DoD Component, may allow an employee to return to duty in a sensitive position if it is determined that this action should no longer pose a danger to public health or safety or to U.S. national security.

e. DoD Components shall initiate action to discipline any employee found using illegal drugs provided that such action is not required for an employee who does the following:

(1) Voluntarily identifies himself or herself as a user of illegal drugs or who volunteers for drug testing under paragraph E.6.c., above, before being identified through other means.

G. EFFECTIVE DATE AND IMPLEMENTATION

21 This Directive is effective immediately. DoD Components shall forward two copies of implementing documents, reflecting any changes to existing civilian employee drug abuse programs necessitated by this Directive, to the ~~Assistant Secretary of Defense (Force Management and Personnel)~~ within 120 days. DEFINITIONS

or nonappropriated

1. DoD Civilian Employee. A DoD employee paid from appropriated funds.
2. Employee Assistance Programs (EAPs). DoD Component-based counseling programs that offer assessment, short-term counseling, and referral services to employees for a wide range of drug, alcohol, and mental health problems that affect employee job performance. EAPs are responsible for referring employees who are abusing drugs for rehabilitation and for monitoring employees' progress while in treatment as set forth in DoD Directive 1010.6 (reference (j)).
3. Illegal Drugs. A controlled substance included in Schedule I or II, as defined by 21 U.S.C. 802(6) (reference (i)), the possession of which is unlawful under Chapter 13 of 21 U.S.C. (reference (h)). The term "illegal drugs" does not mean the use of a controlled substance under a valid prescription or other use authorized by law.
4. Random Testing. A system of drug testing imposed without individualized suspicion that a particular individual is using illegal drugs. Random testing either may be testing of testing-designated employees occupying a specified area, element, or position, or may be statistically random sampling of such employees based on a neutral criterion; i.e., social security numbers.
5. Reasonable Suspicion. An articulable belief that an employee may have used illegal drugs, among other things, based on the following:
 - a. Observable phenomena, such as direct observation of drug use or possession and/or the physical symptoms of being under the influence of a drug.
 - b. A pattern of abnormal conduct or erratic behavior.
 - c. Arrest or conviction for a drug-related offense, or the identification of an employee as the focus of a criminal investigation into illegal drug possession, use, or trafficking.
 - d. Information provided either by reliable and credible sources or independently corroborated.
 - e. Newly discovered evidence that the employee has tampered with a previous drug test.
6. Sensitive Position refers to the following:
 - a. An employee in a position that a DoD Component Head designates Special-Sensitive, Critical-Sensitive, or Noncritical-Sensitive, under the FPM Supplement 792-2 (reference (k)), or an employee in a position that a DoD Component Head designates as sensitive in accordance with E.O. 10450, as amended (reference (l)).
 - b. An employee who has been granted access to classified information or may be granted access to classified information under a determination of trustworthiness by a DoD Component Head under E.O. 12356 (reference (m)).
 - c. Individuals serving under Presidential appointments.

FINDINGS BY THE PRESIDENT

- A. Drug use is having serious adverse effects on a significant proportion of the U.S. work force and results in billions of dollars of lost productivity each year.
- B. The Federal Government, as an employer, is concerned with the well-being of its employees, the successful accomplishment of Agency missions, and the need to maintain employee productivity.
- C. The Federal Government, as the largest employer in the United States, may and should show the way towards achieving drug-free workplaces through a program designed to offer drug users a helping hand and, at the same time, demonstrate to drug users and potential drug users that drugs shall not be tolerated in the Federal workplace.
- D. The profits from illegal drugs provide the single greatest source of income for organized crime, fuel violent street crime, and otherwise contribute to the breakdown of society.
- E. The use of illegal drugs by Federal employees, on or off duty, is inconsistent not only with the law-abiding behavior expected of all citizens, but also with the special trust placed in such employees as servants of the public.
- F. Federal employees who use illegal drugs, on or off duty, tend to be less productive, less reliable, and prone to greater absenteeism than their fellow employees who do not use illegal drugs.
- G. The use of illegal drugs, on or off duty, by Federal employees impairs the efficiency of Federal Departments and Agencies, undermines public confidence in them, and makes it more difficult for other employees who do not use illegal drugs to perform their jobs effectively. The use of illegal drugs by Federal employees, on or off duty, also may pose a serious health and safety threat to members of the public and to other employees.
- H. The use of illegal drugs by Federal employees, on or off duty, in certain positions evidences less than the complete reliability, stability, and good judgement that is consistent with access to sensitive information and creates the possibility of coercion influence, and irresponsible action under pressure that may pose a serious risk to U.S. national security, the public safety, and the effective enforcement of the law.
- I. Federal employees who use illegal drugs must be primarily responsible for changing their behavior and, if necessary, begin the process of rehabilitating themselves.

A. REISSUANCE AND PURPOSE

This Directive reissues reference (a) to:

1. Update the establishment of the DoD Civilian Employee Drug Abuse Testing Program under references (b) and (c).
2. Update policy, prescribe procedures, and assign responsibilities for drug abuse urinalysis testing for DoD civilian employee (hereafter referred to as "employees").

B. APPLICABILITY AND SCOPE

This Directive:

1. Applies to the Office of the Secretary of Defense (OSD), the Military Departments (including their Reserve components), the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Unified and Specified Commands, and the Defense Agencies (hereafter referred to collectively as "DoD Components"). Testing of foreign national employees stationed outside the United States may be conducted under this Directive only as authorized by and consistent with intergovernmental and labor agreements negotiated on a country-by-country basis.

2. Shall not be deemed to limit the authorities of the Director of Central Intelligence under "The National Security Act of 1947" (reference (d)), as amended, or the statutory authorities of the National Security Agency (NSA) or the Defense Intelligence Agency (DIA). Implementation of this Directive within the Intelligence Community, as defined in Executive Order 12333, (reference (e)), shall be subject to the applicable provisions of 5 U.S.C. 7301 (reference (c)).

4. The Secretary of the Army is responsible for specimen collection, laboratory testing, and ancillary administrative requirements for employees of OSD and DoD Activities. An applicable memorandum of understanding (MOU) shall be entered into by the Secretary of the Army and the Director, WHS, for this purpose.

5. The Heads of DoD Components:

a. Shall develop a plan and implementing documents for achieving the objective of a drug-free workplace with due consideration to the rights of the Government, the employee, and the general public. Prior to implementation, the plan and the implementing documents shall include the following:

(1) A statement of policy on the DoD Component's expectations on drug use and the action to be anticipated in response to identified drug use.

Employee Assistance Programs

(2) (EAPs) emphasizing education and counseling, to include referral where applicable to rehabilitative treatment and programs in accordance with available community resources.

(3) Supervisory training to assist in identifying and addressing illegal drug use by DoD Component employees.

(4) Provision for self-referral and supervisory referral to treatment with maximum respect for individual confidentiality consistent with safety and security.

(5) Provision for identifying users of illegal drugs, including testing on a controlled and carefully monitored basis in accordance with this Directive.

(6) The positions designated for random drug testing along with the criteria and procedures applied in designating such positions for drug testing, including the justification for such criteria and procedures.

b. Shall establish a program for random testing of employees in sensitive positions for the use of illegal drugs. Testing-designation positions are positions that have been designated for random testing. The extent to which such employees are tested and the criteria for such testing shall be determined by the Head of each DoD Component, based on the DoD Component's mission and its employees' duties, the efficient use of DoD Component resources, and the danger to public health and safety or to U.S. national security that might result from the failure of an employee to discharge his or her position adequately.

c. Shall establish a program for voluntary employee drug testing.

d. Are authorized, in addition to the testing program established under paragraph E.6.b., above, to test any employee for illegal use under the following circumstances:

(1) When there is a reasonable suspicion that any employee uses illegal drugs.
